SUMMARY

Motivated Final year B.Tech Artificial Intelligence and Data Science student (CGPA: 8.30) with strong foundations in Java, Spring Boot, REST APIs, SQL, and Object-Oriented Programming. Experienced in developing backend applications, designing database-driven solutions, and working with modern tools such as Git, Docker, PySpark, and Apache Airflow. Passionate about software development and problem-solving, seeking a Software Engineering role to build scalable, high-quality applications and contribute across development and data-driven solutions.

EDUCATION

B.Tech - Artificial Intelligence and Data Science	2023 - Present
<i>JJ College of Engineering and Technology, Trichy</i>	CGPA : 8.30
HSLC	2022-2023
<i>ST. Vincent Higher Secondary School, Trichy</i>	Percentage : 70.80%
SSLC	2020-2021
<i>ST. Vincent Higher Secondary School, Trichy</i>	Percentage : 75%

SKILLS

Programming Languages: *Java, SQL*
Backend & Databases: Spring Boot, REST APIs, MySQL
Data Engineering: PySpark, Apache Airflow, Medallion Architecture
AI/ML: Machine Learning, NLP, Generative AI
Tools & DevOps: Git, GitHub, Docker
Concepts: OOPs, Three-Tier Architecture, ER & UML Diagrams

PROJECTS

- Telecom Consumer Complaint Intelligence Platform | Tech:** *Python, PySpark, Docker, Streamlit, PostgreSQL*
- Built an end-to-end data engineering pipeline using PySpark, PostgreSQL, and Docker with Bronze–Silver–Gold architecture for scalable data processing.
 - Developed KPI dashboards in Streamlit with real-time analytics and optimized querying for operational insights.
- AI-Based Farmer Query System | Tech:** *Python, ML, NLP*
- Developed an AI-powered advisory system using ML and NLP to process regional language text and voice queries.
 - Implemented intelligent query classification for crops, soil, weather, and pest management recommendations.
- Motion Activated Alarm System | Tech:** *IoT, Embedded Systems*
- Built a real-time motion detection security system with automated alert triggering using sensor-based architecture.
 - Designed a deployable prototype for surveillance and restricted-area monitoring applications.

COMPETITIVE PROGRAMMING & PROFILES

Active on LeetCode, HackerRank, and CodeChef — consistently solving DSA problems in Java and Python to sharpen algorithmic thinking.

Volunteer — Zoho Corporation

Managed test operations at a Zoho assessment event, ensuring smooth execution of test processes, maintaining an organized environment, and coordinating logistics for large-scale candidate management.

CERTIFICATIONS

- RDBMS-Postgre SQL 2024 - EduPyramids
- TNEA Women's Hackathon 2025 - Sona College of Engineering, Salem
- Certificate in Artificial Intelligence 2024 - NoviTech Pvt&Ltd
